EFCUT DCP100-13HP wood chipper designed for commercial using purpose. It is widely used for fresh and dry tree branches cutting as well as some big wood. Now it is more convenient to move with tow bar. we made precise adjustment for every part in order to obtain the best performance. But don't let engine power fool you, only with 13HP engine, 4 inch wood can be cut into 0.1mm slice. Furthermore the small engine can reduce exhaust gas emission and save much money from the petrol cost. It is more like commercial and environmental equipment.
