

EFCUT SCP100-15H Chipper Shredder Assembling

1 step:

Open the packaging plywood box and take out the machine with parts.

2 step:

Install the wheels, brackets and input chute.

(Take the **fingered bolt** Out. It is only designed to keep safety when replacing blades)

3 step:

Install output chute.

4 step:

Connect the emergency stop button wire, install handrail and make sure all the assembled parts fixed well.
